

## **Prospective Parent Information**

### **Description:**

HIS STEM Preschool is a school that combines Science, Technology, Engineering, and Math with Early Childhood learning standards. Our curriculum is infused with hands-on experiments and themed field trips that encourage real world learning opportunities.

Classes start every morning with a Morning Meeting, where students learn Thematic songs, Scriptures and Biblical lessons. Students also review The Alphabet, Numbers, Days of the Week, Months of the Year, Basic Sign Language, Introductory Spanish and Write their full Names and Birthday. Students are expected to wear appropriate uniforms Monday - Thursday, with Friday fully reserved for dress down.

### **History**

Dr. Phaedra L. Brown, a certified Science Teacher, taught high school Math, Spanish, and Science for 18 years before opening Hope Institute of Science, better known as HIS STEM PreSchool. While she was in college and graduate school she noticed that African American students were underrepresented in STEM courses and majors. She responded by opening HIS School in her community.

### **Mission**

The mission of HIS STEM Preschool is as follows:

- Create interest in STEM for African American children through STEM preschool program
- Decrease the achievement gap of African American students in Math and Science
- Increase the presence of African Americans in STEM majors and careers

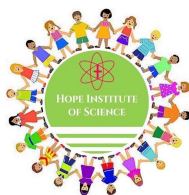

### **Annual Goal:**

To develop well rounded Preschool graduates who are Confident Self-starters, Critical Thinkers, Scientific Investigators with ethical awareness.
